Mr. Terreni:

I am filing the following written comments to you in accordance with Docket No. 2005-385-E – Order No. 2006-680 on the consideration of implementing the requirements of Section 1251 (Net Metering and Additional Standards) of the Energy Policy Act of 2005. I support the federal government's plan for net metering for the following reasons:

- Our current reliance on fossil fuels (including coal, petroleum, and natural gas) is unsustainable in the long run.
- Net metering has already been successfully implemented in 40 states and the District of Columbia.
- Net metering provides a significant financial incentive to change the way we generate electricity and to lower fossil fuel emissions.
- Additionally, I have considered installation of a grid-tied photovoltaic system on my residence, but have been deterred by strong opposition to net-metering by local utilities.

For the above-mentioned reasons I strongly encourage the PSC to set net metering as the standard for the public utilities that it regulates.

Sincerely,

Jonathan Lamb  
951 Beresford Court  
Mount Pleasant, SC 29464
